Vinorelbine capsules · non-small-cell lung cancer

Vinorelbine chemotherapy can help control non-small-cell lung cancer and its symptoms. The team weighs possible benefit against side effects, previous treatments and your priorities, and reviews whether to continue.

My overall treatment

ONCE WEEKLY. First 3 administrations 60 mg/m², total maximum 120 mg. From administration 4, 80 mg/m² (maximum 160 mg) only after the team reviews nadirs and toxicity. 60 or 50 mg/m²/lower may be needed. Continue weekly while helpful and tolerated; no fixed total number of weeks.

Treatment
Once every 7 days after blood-test clearance. Duration agreed with your team.

Review
Your team reviews benefit and side effects, then agrees whether to continue, pause or change treatment.

A typical 7-day cycle

Day 1–7
One reference cycle

Timing may change after review. Side effects can occur on any day; there are no guaranteed safe days.

My tests and checks

When	What is checked	Timing / reason
Before	**Blood count, kidneys / liver, nerves** Required by regimen	Before first treatment
During	**Blood count** Required by regimen	Before every weekly dose
During	**Kidneys / liver** Required by regimen	At the start of each 7-day cycle
After / review	**Scans, markers and recovery** Team-agreed plan	Individual plan; no fixed scan or tumour-marker interval

Between treatments

- Take capsules only once on the prescribed weekly day, after blood-test clearance. They are not a daily medicine.
- The first three administrations use an introductory dose; any later increase depends on counts and the prescription.

Bring your medicine list and report new symptoms before dosing. Confirm the prescription, test appointments and daytime / out-of-hours contact plan.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment.

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321

EXAMPLE NUMBERS ONLY — your team must replace these before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.

What to watch for

You do not need to know which medicine caused a symptom before calling.

1. Blood counts and infection

Vinorelbine

Low blood counts can cause infection, tiredness, bruising or bleeding. Fever, chills or sudden illness: call oncology immediately.

3. Tingling, numbness or weakness

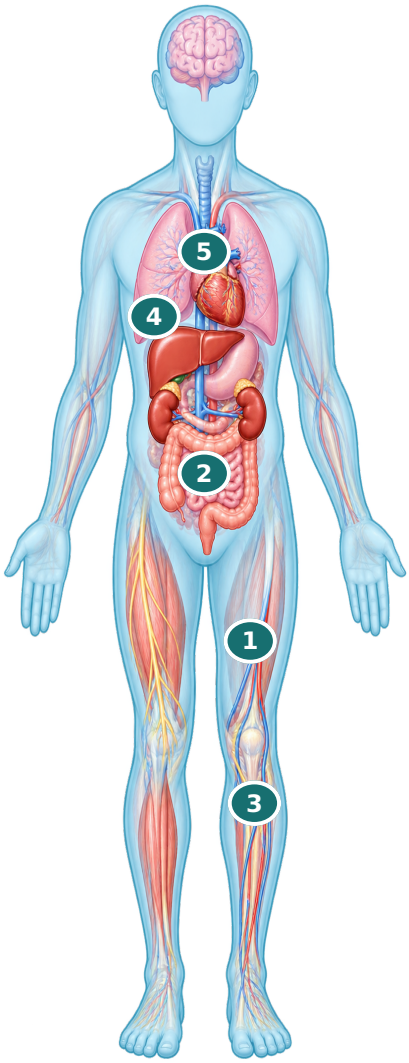

Vinorelbine

Nerve effects may change sensation, grip, walking or bowel movement. Report changes early because the next dose may need to wait or be reduced.

5. Uncommon serious symptoms

Vinorelbine

New chest pain, sudden or worsening breathlessness, or severe allergic symptoms need urgent medical help. Previous heart disease and interacting medicines need review before treatment.

2. Bowel and mouth symptoms

Vinorelbine

Constipation, vomiting or sore mouth can occur. Severe pain, swelling, repeated vomiting or no stool/gas: urgent assessment; do not take extra laxatives.

4. Fatigue, hair and liver tests

Vinorelbine

Tiredness, hair thinning/loss and liver-test changes can occur. Pace activities and tell the team if eating, drinking or daily tasks become difficult.

Selected effects, not every possible effect or a prediction. Match each number to its symptom box. Blood, skin and nerve markers are schematic.

Use the treating unit’s 24-hour emergency number and local fever threshold. Contact immediately for fever/chills, sudden illness, breathlessness/chest pain, uncontrolled vomiting, severe abdominal pain/ obstruction symptoms, bleeding or severe allergy. Do not wait until the next visit.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital’s temperature instructions. If you cannot reach the team, seek urgent medical assessment.

My Treatment Card

SACTCheck

Name: _____

Vinorelbine capsules

Once every 7 days after blood-test clearance. Duration agreed with your team.

Phase: _____ Cycle plan: team to confirm

Daytime (EXAMPLE) 087 12345678
Out of hours (EXAMPLE) 087 87654321

Unwell or fever? Call oncology now.
Severe breathing difficulty, chest pain or collapse: **112 / 999.**

EXAMPLE NUMBERS — replace before patient use.

CUT outer border

BACK / CYCLE RECORD

My cycle record

Rolling record — not a fixed treatment course.

Cycle	Date / initials

My treatment information

Latest treatment date: _____

Plan changed? Ask the team to update this card.

FOLD centre — do not cut

Keep the record accurate

The team dates and initials a cycle when it is complete, after the final planned dose. Delays, omitted doses or a changed plan need a note or a replacement card. A stamp does not approve the next treatment. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.
