Vinorelbine capsules · non-small-cell lung cancer

NCCP 00259 · Source reconciled; independent clinical, pharmacy and patient/PPI review pending

PRACTICAL TREATMENT GUIDE

Your practical treatment plan

ONCE WEEKLY. First 3 administrations 60 mg/m², total maximum 120 mg. From administration 4, 80 mg/m² (maximum 160 mg) only after the team reviews nadirs and toxicity. 60 or 50 mg/m²/lower may be needed. Continue weekly while helpful and tolerated; no fixed total number of weeks.

STEP 1

Visits and tests

Home dosing still needs weekly blood tests and explicit team clearance. Arrange a reliable weekly routine and a way to contact the team before taking a dose if unwell.

STEP 2

Treatment preparation

Record actual dose, capsule strengths/count, date taken, vomiting and side effects in the passport. An unfilled date is not a request for patients to calculate treatment dates.

STEP 3

At home

Ensure access to a refrigerator if required by the dispensed pack; discuss travel/transport with pharmacy.

STEP 4

Contacts / follow-up

Current Vinorelbine Accord SmPC: refrigerator 2–8°C. Confirm the dispensed brand/pack instructions; keep in original packaging and out of children’s reach. Return unused or damaged capsules to pharmacy; follow cytotoxic handling advice.

Individual instructions

Take with some food; swallow capsules whole with water. Do not chew, suck or dissolve. The exact total dose may require more than one capsule; pharmacy provides the strengths and number. Verify the weekly date, dose and capsule count each time. Do not take another dose if vomiting occurs within a few hours. Contact the team and record the dose taken. Do not swallow damaged capsules. Return them to pharmacy; immediately wash any contact with contents using water or saline. Missed/late dose: contact the team for the next date. Do not double or move the weekly schedule yourself. This is pragmatic medication-safety advice, not an extra NCCP catch-up schedule.
