Gemcitabine alone: nasopharyngeal cancer

National Cancer Control Programme (NCCP) 00514 · Source reconciled draft; independent clinical, pharmacy and patient/PPI review pending

PRACTICAL TREATMENT GUIDE

Practical treatment planning

Agree the arrangements with your oncology team.

STEP 1

Before your first visit

Full blood count, kidney and liver tests; review medicines, allergies, weight, oral intake and symptoms.

STEP 2

Time in the unit

Gemcitabine is given into a vein over 30 minutes on Days 1 and 8. Checks, preparation and observation add to the time in the unit.

STEP 3

Keep one calendar

The team reviews symptoms, side effects and response. Treatment may finish earlier if it is no longer helping or causes unacceptable problems.

STEP 4

Leaving the unit

Confirm the next tests, medicines, treatment dates and verified daytime and out-of-hours contact numbers.

STEP 5

Practical help

Ask about transport, work, costs, communication needs and whether a support person can attend.
