SACTCHECK · TREATMENT PASSPORT

Vismodegib for advanced basal cell skin cancer

A record of what you experience

One review period per page. Each medicine has its own symptom table. Mark the worst symptoms since your last review, when they occurred and what they stopped you doing. Overlapping symptoms can be recorded under more than one medicine; you do not have to identify the cause.

These are patient-language severity prompts, not a validated questionnaire or a formal CTCAE grading tool. Your team assigns the clinical grade. Serious symptoms override the columns: call without waiting to decide a severity level.

Take vismodegib once every day at the same time, continuously while the team considers it beneficial and tolerable. A 28-day calendar organises the four-week review; it is not a planned seven-day break or a fixed number of courses.

These pages are reusable recording sheets; the prescribed course length is stated above. Ask for additional sheets as needed.

Emergency: 112 / 999. Severe breathing difficulty, collapse, seizure or severe chest pain needs emergency help.

Contact oncology immediately for temperature ≥37.5°C or ≤36°C, shivering or suddenly feeling unwell, even with a normal temperature. Follow your own hospital's instructions. If you cannot reach the team, seek urgent medical assessment.

Full patient information, sources and visual timeline. No identifiers are encoded.

Draft source reconciliation; independent clinical, pharmacy and patient/PPI review pending

My diagnosis, plan and medicines

Complete these pages with your team. Leave unknown or inapplicable items blank. This record supports the consent discussion and your written prescription.

Diagnosis and overall plan

Original BCC site / biopsy date

Locally advanced or metastatic / current disease sites

Prior surgery, margins, reconstruction or radiotherapy

Inherited syndrome or specialist skin plan if applicable

Reason surgery / radiotherapy unsuitable and treatment aim

Medicines and safety

Anticancer medicines / actual dose / route / start date

Treatment received, missed or held / restart instruction

All other medicines / allergies / important previous reactions

Pregnancy-prevention or immune-alert plan / continuing precautions

Oncology / out-of-hours / pharmacy contacts

NCCN Guidelines for Patients: Basal Cell Skin Cancer, 2026 - supplied education reference; original fields adapted to the Irish NCCP regimen context. No NCCN form or artwork reproduced.. Your Irish treating team confirms the diagnosis, prescription and follow-up plan.

My checks, symptoms and support

Record what each test is checking and when the result will be discussed. Your team explains which examinations or scans are needed for your diagnosis and treatment.

Test and purpose	Date / booking contact	Result discussion	Agreed next step

Record bloods, skin/lesion examinations, scans and specialist checks separately. Tumour-marker and scan intervals are individually selected; do not infer them from the cycle calendar.

Symptoms, skin and support

New symptoms / onset / change / action taken

Lesion or wound / pain / eating / weight / daily function

Skin self-check plan / optional dated photograph record kept privately

Sun protection / practical, emotional or family support needs

Questions, response review and the outcomes that matter to me

My urgent contact plan / what my carer should do

NCCN Guidelines for Patients: Basal Cell Skin Cancer, 2026 - supplied education reference; original fields adapted to the Irish NCCP regimen context. No NCCN form or artwork reproduced.. Your Irish treating team confirms the diagnosis, prescription and follow-up plan.

Vismodegib for advanced basal cell skin cancer

Review period: _____ Start date: _____ Next review: _____

Record the actual date, treatment received, any hold, important symptom and the next check. A review visit is not automatically a medicine dose or a completed cycle.

Daily medicines and review record · copy this sheet for another review period of the same phase.

Vismodegib · Oral targeted capsule

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Muscle cramps	☐ None	☐ Mild cramps: record	☐ Repeated cramps: contact team	☐ Severe pain / weakness or dark urine: urgent review	☐ Sudden major weakness / collapse: 112/999
