NCCP 00415 · clinician draft

Dabrafenib and trametinib for advanced BRAF-mutated melanoma

Your diagnosis and treatment setting NCCP 00415a: unresectable or metastatic melanoma with a BRAF V600 mutation. This route covers advanced disease; the separate 00415/adjuvant guide covers the 12-month postoperative setting.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Continuous oral treatment** — Moderate to high (oral)
  Dabrafenib + Trametinib
