SACTCHECK · TREATMENT PASSPORT

Cemiplimab for advanced cutaneous squamous cell cancer

A record of what you experience

One cycle per page. Each medicine has its own symptom table. Mark the worst symptoms since your last review, when they occurred and what they stopped you doing. Overlapping symptoms can be recorded under more than one medicine; you do not have to identify the cause.

These are patient-language severity prompts, not a validated questionnaire or a formal CTCAE grading tool. Your team assigns the clinical grade. Serious symptoms override the columns: call without waiting to decide a severity level.

Cemiplimab is given by IV infusion on Day 1 every 21 days. The usual source dose is 350 mg over 30 minutes; the prescription and visit checks confirm your treatment. There is no fixed cycle total in this regimen: treatment continues while the team considers it beneficial and tolerable.

These pages are reusable recording sheets; the prescribed course length is stated above. Ask for additional sheets as needed.

Emergency: 112 / 999. Severe breathing difficulty, collapse, seizure or severe chest pain needs emergency help.

Contact oncology immediately for temperature ≥37.5°C or ≤36°C, shivering or suddenly feeling unwell, even with a normal temperature. Follow your own hospital's instructions. If you cannot reach the team, seek urgent medical assessment.

My diagnosis, plan and medicines

Complete these pages with your team. Leave unknown or inapplicable items blank. This record supports the consent discussion and your written prescription.

Diagnosis and overall plan

Original skin SCC site / pathology date

Stage / nodes / other sites / recurrence

Depth, nerve involvement or other high-risk features

Immunosuppression / transplant team if applicable

Earlier surgery / RT and reason curative local treatment is unsuitable

Medicines and safety

Anticancer medicines / actual dose / route / start date

Treatment received, missed or held / restart instruction

All other medicines / allergies / important previous reactions

Pregnancy-prevention or immune-alert plan / continuing precautions

Oncology / out-of-hours / pharmacy contacts

NCCN Guidelines for Patients: Squamous Cell Skin Cancer, 2023 - supplied education reference; original fields adapted to the Irish NCCP regimen context. No NCCN form or artwork reproduced.. Your Irish treating team confirms the diagnosis, prescription and follow-up plan.

My checks, symptoms and support

Record what each test is checking and when the result will be discussed. Your team explains which examinations or scans are needed for your diagnosis and treatment.

Test and purpose	Date / booking contact	Result discussion	Agreed next step

Record bloods, skin/lesion examinations, scans and specialist checks separately. Tumour-marker and scan intervals are individually selected; do not infer them from the cycle calendar.

Symptoms, skin and support

New symptoms / onset / change / action taken

Lesion or wound / pain / eating / weight / daily function

Skin self-check plan / optional dated photograph record kept privately

Sun protection / practical, emotional or family support needs

Questions, response review and the outcomes that matter to me

My urgent contact plan / what my carer should do

NCCN Guidelines for Patients: Squamous Cell Skin Cancer, 2023 - supplied education reference; original fields adapted to the Irish NCCP regimen context. No NCCN form or artwork reproduced.. Your Irish treating team confirms the diagnosis, prescription and follow-up plan.

NCCP 00812 V3A · ONE CYCLE, ONE PAGE

Cemiplimab for advanced cutaneous squamous cell cancer

Cycle number: _____ Start date: _____ Next review: _____

Record the actual date, treatment received, any hold, important symptom and the next check. A review visit is not automatically a medicine dose or a completed cycle.

Cemiplimab: ongoing treatment visits · copy this sheet for another cycle of the same phase.

Cemiplimab · PD-1 checkpoint immunotherapy

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Bowels	☐ Usual pattern	☐ New change: report	☐ Persistent diarrhoea / constipation: call	☐ Blood, severe pain or dehydration: urgent review	☐ Collapse or severe sudden illness: 112/999
Breathing	☐ Usual breathing	☐ New cough / change: call	☐ Worsening breathlessness: urgent advice	☐ Breathless at rest: urgent assessment	☐ Severe breathing difficulty: 112/999
Skin	☐ No change	☐ New small change: report	☐ Persistent rash / itch: contact team	☐ Painful, spreading or blistering rash: urgent review	☐ Severe skin reaction with acute illness: emergency help
Fatigue	☐ Usual energy	☐ Tiredness improves with rest	☐ Rest does not help; usual tasks affected: call	☐ Self-care difficult: urgent review	☐ Collapse: 112/999

Dates / doses missed or changed / symptoms affecting daily life / questions:

Red flags override the table. Fever, shivers, suddenly unwell, chest symptoms or inability to drink: seek prompt advice. Severe breathing difficulty, collapse or severe chest pain: 112 / 999.
