Keep the record accurate

The team records each injection and the next planned date. The record does not define the total treatment duration. Record any delayed dose or changed plan. An entry does not authorise the next injection. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.
