NCCP 00461 · clinician draft

Temozolomide with short-course radiotherapy, then adjuvant treatment

Temozolomide + short RT Adults older than 65 with newly diagnosed glioblastoma who are not suitable for the standard radiotherapy regimen with temozolomide, under NCCP 00461. Use the plan matched to your diagnosis and phase; do not borrow another glioma schedule.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Concurrent daily temozolomide with radiotherapy** — Moderate to high (oral)
  Temozolomide
- **Adjuvant temozolomide Days 1–5 every 28 days** — Moderate to high (oral)
  Temozolomide
