SACTCHECK · REGIMEN-SPECIFIC SACT CONSENT

PROTOTYPE · GOVERNANCE REVIEW REQUIRED

Carboplatin and paclitaxel · lung cancer

Standalone chemotherapy · adjuvant or advanced NSCLC · NCCP 00304 · version 8 · 21-day cycle

Patient name	DOB	Hospital no.	Date

Treatment context
After surgery, treatment aims to reduce the chance of lung cancer returning. For advanced lung cancer, it aims to control cancer and help symptoms. Your team confirms which aim applies to you.

Schedule
Both medicines on Day 1, repeated every 21 days for four planned cycles, unless cancer progresses or side effects require a change. This standalone plan does not include nivolumab or radiotherapy.

1. TREATMENT DISCUSSION

- ☐ Purpose, expected benefit and alternatives explained
- ☐ Indication, medicines, sequence and duration confirmed
- ☐ Blood tests and any individually indicated heart checks discussed
- ☐ Support medicines and phase changes explained
- ☐ Fertility, contraception and breastfeeding discussed where relevant
- ☐ Common, serious and lasting drug-specific risks discussed below
- ☐ Urgent symptoms and local contact details confirmed

2. REGIMEN / AGENT-SPECIFIC MATERIAL RISKS

Paclitaxel
CHEMOTHERAPY

- ☐ Low blood counts and infection
- ☐ Peripheral neuropathy and hair loss
- ☐ Allergic reactions
- ☐ Muscle and joint pain

Carboplatin
CHEMOTHERAPY

- ☐ Low blood counts and infection
- ☐ Nausea and vomiting
- ☐ Kidney, hearing and nerve effects
- ☐ Allergic reactions

Discuss the individual treatment aim, off-label indication and local approval, alternatives, uncertainty, serious or lasting harm, fertility, pregnancy and breastfeeding, IV access, the four-cycle schedule and urgent contact plan. Nivolumab combinations need a separate consent and guide.

Individual aim / benefit, alternatives, material risks and questions:

3. CONSENT CONFIRMATION

- ☐ Expected benefit, important risks and reasonable alternatives discussed
- ☐ Patient questions invited and answered; patient-specific material risks / priorities considered
- ☐ Emergency contact / toxicity advice and written information offered where appropriate
- ☐ Patient understands consent is voluntary and may be withdrawn

Patient / person giving consent _____ Date _____

Clinician obtaining consent _____ Date _____

Prototype only. This one-page form is a regimen-specific consent aid and requires formal governance, consultant and oncology-pharmacy review before clinical use. The current NCCP regimen, local/national consent policy, current medicine information, patient-specific material risks and clinical judgement remain authoritative.
Base regimen: NCCP 00304 v8.
