Panitumumab

The aim is to control advanced bowel cancer and symptoms. The team reviews how well treatment is working and whether side effects remain acceptable; there is no single fixed number of cycles for everyone.

Advanced / metastatic colorectal cancer · NCCP 00225 v6 · Document revised 5 November 2026

Your personal plan: this is the standard regimen schedule. Your team confirms your prescribed doses, cycles, treatment changes and appointments in your written plan.

My overall treatment

Panitumumab on Day 1 every 14 days while beneficial and tolerable. There is no home chemotherapy pump.

A repeating 14-day cycle

Day 1: panitumumab infusion. There is no home chemotherapy pump in this regimen. A cycle lasts 14 days. Treatment continues while it is helping and side effects remain acceptable.

A typical 14-day cycle

Day 1	Day 2–7	Day 8–14
Review and infusion	At home	Continue care and prepare for review

Timing may change after review. Side effects can occur on any day; there are no guaranteed safe days.

My tests and checks

When	What is checked	Timing / reason
Before	**Bloods and suitability** Regimen / treatment suitability	Blood count, kidney/liver tests and tumour RAS suitability. Review medicines, allergies and symptoms.
During	**Bloods, skin and symptoms** Required by regimen	Blood count, kidney/liver tests before each treatment; check skin, eyes, bowel symptoms and hydration.
During / after	**Magnesium and other minerals** Required by regimen	Monitor during treatment; monthly electrolytes, magnesium and calcium for two months after the last antibody dose.
Review	**Response and recovery** Individual plan	Scans and other response tests follow the consultant plan; follow unresolved effects.

Between treatments

- Report painful rash, sore nails, eye pain or worsening breathing promptly. Keep mineral checks after treatment ends.

Bring your medicine list and report new symptoms before dosing. Confirm test appointments, the skin-care plan and urgent contacts.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321

EXAMPLE ONLY — team must replace both numbers before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.

What to watch for

You do not need to know which medicine caused a symptom before calling.

1 Skin / rash

Panitumumab

Report rash, cracks, painful or infected skin early.

3 Breathing

Panitumumab

New or worsening breathlessness or cough needs assessment.

5 Nails

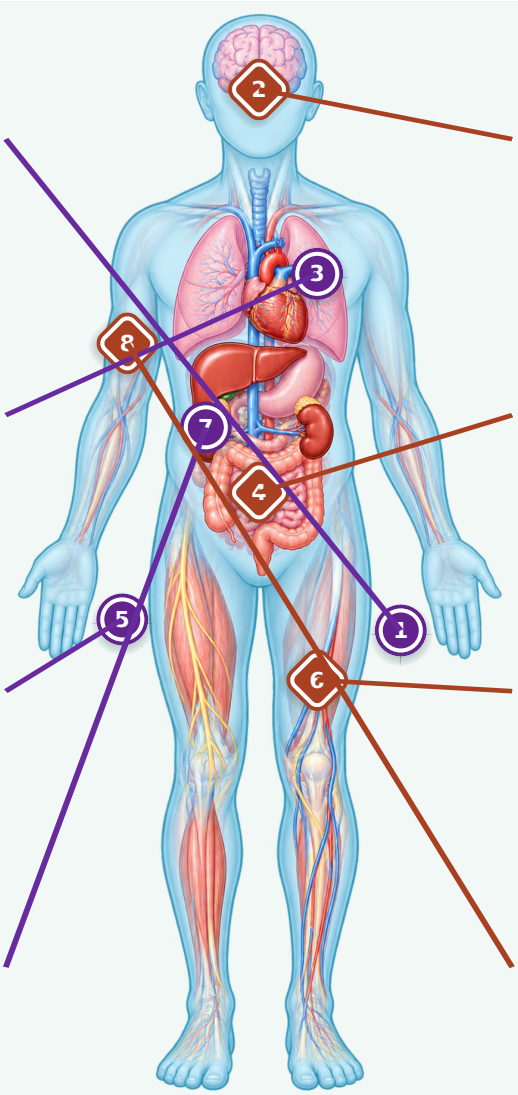

Panitumumab

Painful or infected nail folds need early treatment.

7 Hydration

Panitumumab

Reduced urine or severe dehydration needs urgent advice.

2 Eyes

Panitumumab

New eye pain, light sensitivity or blurred vision: prompt advice.

4 Bowel

Panitumumab

Severe diarrhoea, dizziness or inability to drink: urgent contact.

6 Blood minerals

Panitumumab

Tests check magnesium, calcium and potassium; report cramps or weakness.

8 Infusion reaction

Panitumumab

Tell the nurse about swelling, itching, flushing or breathing changes.

Selected effects, not every possible effect or a prediction. Blood-count, skin and line markers are schematic. Number and text carry meaning; colour is decorative.

Report new breathing difficulty, eye pain or blurred vision, blistering or infected skin, severe diarrhoea or dehydration promptly.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

My Treatment Card

SACTCheck

Name: _____

Panitumumab

Panitumumab Day 1 every 14 days.

Phase: _____ Cycle plan: team to confirm

Daytime (EXAMPLE) 087 12345678

Out of hours (EXAMPLE) 087 87654321

Unwell or fever? Call oncology now.
Severe breathing difficulty, chest pain or collapse: **112 / 999.**

EXAMPLE NUMBERS — replace before patient use.

BACK / TREATMENT RECORD

My cycle record

Rolling record; the team confirms the total treatment plan.

Cycle	Date / initials

My treatment information

Latest treatment date: _____

Plan changed? Ask the team to update this card.

CUT outer border

FOLD centre — do not cut

Keep the record accurate

The team dates and initials each recorded treatment unit when complete. A cycle is complete after its final planned dose; a weekly-treatment stamp records that weekly dose. Delays, omitted doses or a changed plan need a note or a replacement card. A stamp does not approve the next treatment. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.

Your local contacts and resources

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321

EXAMPLE ONLY — team must replace both numbers before patient use.

Hospital / team: _____

Backup if the team cannot be reached: _____

Additional local services and resources will be added when confirmed. Your team must check and complete this page before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.
