NCCP 00691 · clinician draft

FOLFIRINOX followed by chemoradiotherapy · rectal cancer

> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **FOLFIRINOX induction: six 14-day cycles** — High
  Oxaliplatin + Folinic acid + Irinotecan + Fluorouracil
- **Capecitabine with radiotherapy: separate five-week phase** — Oral minimal-to-low; radiation risk assessed separately
  Capecitabine + Radiotherapy
