BASELINE → TREATMENT → FOLLOW-UP

When checks happen

Relative milestones, not equal time intervals. Your team books tests and reviews results; this map does not confirm completion.

Check	Before starting	First treatment	During treatment	Change / completion	Follow-up
Blood / organ function	FBC, renal, liver baseline	FBC before dose (EMA)	FBC before every dose; renal/ liver qcycle	Review count recovery / reductions	Investigate persistent abnormalities
Heart / electrolytes	Correct K, calcium and Mg	ECG if cardiac / QT risk	Periodic electrolytes; ECG when indicated	Review interacting QT medicines	Report palpitations / persistent neuropathy

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00743 v3 · official regimen · NICE NG101 · bone health and follow-up · ASCO · biomarkers in metastatic breast cancer · ESMO metastatic breast cancer guideline · 2026 · EMA Halaven product information · blood counts before every dose

THE WHOLE TREATMENT JOURNEY

Eribulin · Days 1 and 15 of 28: treatment and checks

Locally advanced or metastatic breast cancer after prior chemotherapy · alternative eribulin schedule

Eribulin on Days 1 and 15 of each 28-day cycle. Days 8 and 22 are planned treatment-free weeks. This alternative schedule requires a specific discussion and consent.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before starting	First treatment	During treatment	Change / completion	Follow-up
Treatment plan NCCP 00743	Confirm alternate-schedule consent	Day 1 infusion over 5 minutes	Day 15 infusion; q28-day course	Until progression / intolerance	Next treatment plan
Blood / organ function NCCP 00743	FBC, renal, liver baseline	FBC before dose (EMA)	FBC before every dose; renal/ liver qcycle	Review count recovery / reductions	Investigate persistent abnormalities
Heart / electrolytes NCCP 00743 · SMPC	Correct K, calcium and Mg	ECG if cardiac / QT risk	Periodic electrolytes; ECG when indicated	Review interacting QT medicines	Report palpitations / persistent neuropathy
Cancer review METASTATIC · MARKERS	Confirm setting	Agree review plan	Response / symptom review	Next treatment / completion	Agreed surveillance

What each check is for

1 Before treatment

Before the first dose

Locally advanced or metastatic breast cancer after prior chemotherapy · alternative eribulin schedule. NCCP specifies FBC, kidney and liver tests at baseline and the start of each cycle. EMA Halaven information additionally requires FBC before every dose, including Day 15. Correct low potassium, calcium and magnesium before treatment; monitor periodically.

Ask / act: Confirm eligibility, test results and medicine list.

Sources: NCCP 00743

2 Other checks

At the specified review points

ECG monitoring is indicated with heart failure, bradyarrhythmia, QT-prolonging medicines or electrolyte disturbance. Review QT risk when choosing antiemetics; monitor neuropathy.

Ask / act: Confirm who arranges and reviews each check.

Sources: NCCP 00743 · SMPC

3 Support and practical plan

At each treatment or phase change

No routine hypersensitivity premedication is specified. Low-risk antiemetic support is reviewed separately, including QT interactions.

Ask / act: Choose the matching support plan; confirm active medicines.

Sources: NCCP 00743

4 Response and follow-up

Agreed review points

Agree the scan type and review interval for the known disease sites. Review response, symptoms and toxicity together; new or worsening symptoms may need an earlier assessment. Keep the agreed follow-up and report persistent or new symptoms between visits.

Ask / act: Review symptoms, results and patient priorities.

Sources: METASTATIC · MARKERS

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
