Cetuximab + carboplatin + fluorouracil

Cetuximab with carboplatin and fluorouracil is used to treat squamous head and neck cancer when cisplatin is unsuitable. Your team explains the treatment aim, possible benefit and alternatives for your situation.

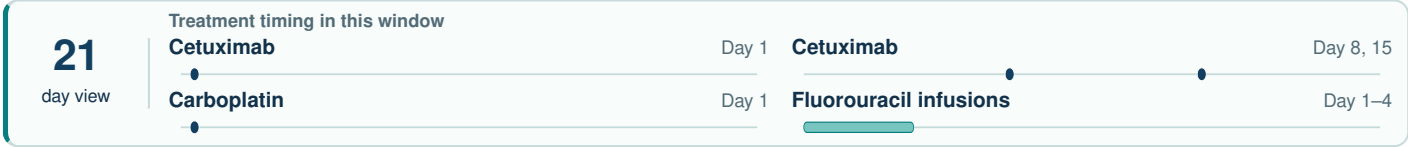

Treatment of locally advanced or metastatic squamous cell cancer of the head and neck when cisplatin cannot be used or tolerated. · NCCP 00418 v7 · Document revised 10 November 2026

Your personal plan: this is the standard regimen schedule. Your team confirms your prescribed doses, cycles, treatment changes and appointments in your written plan.

Treatment of locally advanced or metastatic squamous cell cancer of the head and neck when cisplatin cannot be used or tolerated.

My overall treatment

Every 21 days for up to 6 combination cycles; cetuximab is weekly.

Combination cycles
Day 1: cetuximab plus platinum; Days 1–4: fluorouracil; Days 8 and 15: cetuximab. Up to 6 cycles.

After the combination
Next treatment follows review and a separate prescription; maintenance is not automatic.

A typical 21-day cycle

Day 1–4	Day 5–15	Day 16–21
Combination and fluorouracil days	Recovery plus weekly cetuximab	Prepare the next cycle

Timing may change after review. Side effects can occur on any day; there are no guaranteed safe days.

My tests and checks

When	What is checked	Timing / reason
Before	**Safety and preparation** NCCP / individual plan	Blood count, kidney/liver tests, magnesium, kidney filtration and dihydropyrimidine dehydrogenase (a medicine-processing enzyme) (DPD); allergy history and conditional electrocardiogram (ECG)/hearing checks.
During	**Blood tests and symptoms** NCCP	Blood count, kidney/liver tests and magnesium each cycle; symptom review at weekly cetuximab visits.
After / response	**Follow-up and assessment** NCCP / individual plan	Magnesium, calcium and electrolytes monthly for 2 months after last cetuximab; scans follow your plan.

Between treatments

- Daily 16–22-hour fluorouracil on Days 1–4, or two 48-hour infusions; confirm the prescribed pump timetable.
- Report fever or sudden illness promptly. Follow the written support plan; do not wait for the next visit if symptoms worsen.

Bring your medicines list, appointment calendar, test results and verified urgent contacts.

When to get help
Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.
Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321
EXAMPLE ONLY — team must replace both numbers before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.

What to watch for

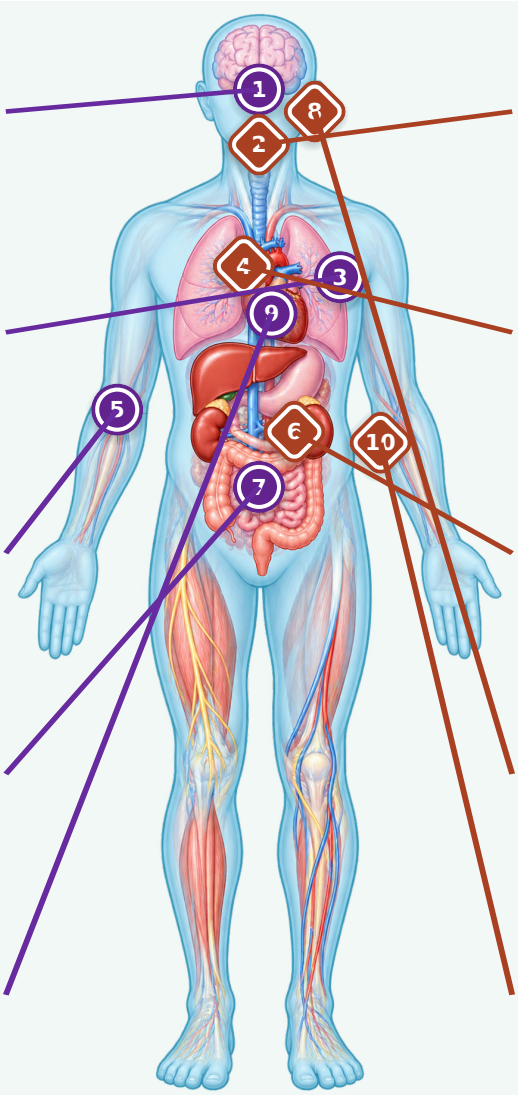

You do not need to know which medicine caused a symptom before calling.

1 Eyes
Cetuximab
Report painful or red eyes, light sensitivity or a change in vision promptly.

2 Mouth / swallowing
Fluorouracil
Report ulcers, painful swallowing or difficulty drinking; early severe symptoms need urgent review.

3 Lungs / breathing
Cetuximab
Report new cough or breathlessness. Wheeze, swelling or faintness may be an infusion reaction.

4 Heart / chest
Fluorouracil
Chest pain, tightness, palpitations or collapse needs urgent assessment during or after an infusion.

5 Skin / nails / hands / feet
Cetuximab + fluorouracil
Report rash, cracked skin, painful nails or sore palms/soles. Spreading redness, pus or fever needs early review.

6 Minerals / fluids
Cetuximab
Low magnesium or other minerals may show on blood tests. Report cramps, weakness or palpitations.

7 Bowels / hydration
Fluorouracil
Call early for diarrhoea, severe tummy pain, dizziness or inability to keep fluids down.

8 Hearing / balance
Carboplatin
Report tinnitus, hearing change, numbness or tingling before treatment, especially after prior platinum.

9 Blood cells / infection
Chemotherapy
Fever, shivering, sudden illness, unusual bruising or bleeding needs prompt oncology advice.

10 Infusion / access site
Cetuximab + chemotherapy
Tell staff about itching, swelling, wheeze or faintness immediately. Delayed reactions can occur after leaving.

Selected effects, not every possible effect or a prediction. Blood-count, skin and line markers are schematic. Number and text carry meaning; colour is decorative.

Call oncology immediately for fever, shivering, sudden illness, persistent vomiting, diarrhoea, severe mouth pain or inability to drink. Chest pain during or after fluorouracil, or unusually early severe symptoms, needs urgent assessment even if DPD testing was normal. Report breathing difficulty, swelling, faintness, spreading skin infection or painful eyes promptly. Severe chest pain, severe breathing difficulty, collapse or a seizure is an emergency.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

My Treatment Card

SACTCheck

Name: _____

Cetuximab + carboplatin + fluorouracil

Every 21 days for up to 6 combination cycles; cetuximab is weekly.

Phase: _____ Planned cycles: 6

Daytime (EXAMPLE) 087 12345678
Out of hours (EXAMPLE) 087 87654321

Unwell or fever? Call oncology now.
Severe breathing difficulty, chest pain or collapse: **112 / 999.**

EXAMPLE NUMBERS — replace before patient use.

BACK / TREATMENT RECORD

My cycle record

Team stamps after each completed cycle.

C1	C2	C3	
Date / initials	Date / initials	Date / initials	My treatment information
C4	C5	C6	
Date / initials	Date / initials	Date / initials	

Plan changed? Ask the team to update this card.

CUT outer border

FOLD centre — do not cut

Keep the record accurate

The team dates and initials each recorded treatment unit when complete. A cycle is complete after its final planned dose; a weekly-treatment stamp records that weekly dose. Delays, omitted doses or a changed plan need a note or a replacement card. A stamp does not approve the next treatment. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.
