SACTCHECK · TREATMENT PASSPORT

Everolimus · neuroendocrine tumours

A record of what you experience

One cycle per page. Each medicine has its own symptom table. Mark the worst symptoms since your last review, when they occurred and what they stopped you doing. Overlapping symptoms can be recorded under more than one medicine; you do not have to identify the cause.

These are patient-language severity prompts, not a validated questionnaire or a formal CTCAE grading tool. Your team assigns the clinical grade. Serious symptoms override the columns: call without waiting to decide a severity level.

Take the prescribed everolimus dose once daily every day, at the same time and consistently with or without food. There is no planned tablet-free week.

The four pages are reusable recording sheets, not a prescribed four-cycle course. Ask for additional sheets as needed.

Emergency: 112 / 999. Severe breathing difficulty, collapse, seizure or severe chest pain needs emergency help.

Contact oncology immediately for temperature ≥37.5°C or ≤36°C, shivering or suddenly feeling unwell, even with a normal temperature. Follow your own hospital's instructions. If you cannot reach the team, seek urgent medical assessment.

Source reconciled; independent clinical, pharmacy and patient/PPI review pending

My diagnosis, plan and priorities

Complete these pages with your team. Leave an item blank if it does not apply or is not yet known. This personal record does not replace your prescription, clinical notes or consent discussion.

My NET diagnosis

Primary site

Pathology wording / differentiation

Grade

Ki-67 result and sample date (if reported)

Stage / sites involved

Functioning or nonfunctioning / hormone syndrome

SSTR scan result and date

Diagnosis explained by / date

My goals and treatment sequence

What matters most to me

Treatment aim

Current medicines and dose / written prescription location

Other planned surgery, radiation, liver-directed or hormone treatment

Next decision or scan review

Lead team and coordinating nurse

Education informed by NCCN Guidelines for Patients: Neuroendocrine Tumors (2026); written for this Irish treatment context. Your team confirms your individual plan.

My tests, symptoms and support

Safety blood tests, scans to assess treatment, and tests for hormone symptoms have different purposes. Record only the tests agreed for you.

Test and purpose	Due / booking contact	Result explained by / date	Agreed next step

Do not convert every NET marker into a routine test. Record the individual plan.

Symptoms and support

Usual bowel pattern / flushing / glucose symptoms

Changes and impact on daily life

Hormone symptom rescue plan if prescribed

Nutrition / weight / enzyme support

Other medicines and supplements

Questions for my team

Education informed by NCCN Guidelines for Patients: Neuroendocrine Tumors (2026); written for this Irish treatment context. Your team confirms your individual plan.

Everolimus · neuroendocrine tumours

Cycle number: _____ Start date: _____ Next review: _____

Record the prescribed dose, doses taken or held, symptoms, blood tests and review dates. A stamp records care; it does not authorise the next dose.

Everolimus · Targeted therapy tablet

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Mouth soreness / ulcers	☐ None	☐ Mild soreness; eating normally	☐ Painful; soft food needed: call	☐ Cannot eat / drink enough: urgent review	☐ Major breathing difficulty: 112/999
Breathing / cough	☐ Usual breathing	☐ New cough or breathlessness: call promptly	☐ Symptoms with usual activity: urgent review	☐ Breathless at rest: urgent assessment	☐ Severe breathing difficulty / collapse: 112/999
Fatigue	☐ Usual energy	☐ Tiredness improves with rest	☐ Rest does not help; usual tasks affected: call	☐ Self-care difficult: urgent review	☐ Collapse: 112/999
Diarrhoea	☐ Usual pattern	☐ Up to 3 extra stools above normal	☐ 4–6 extra stools/day or at night: call	☐ 7+ extra stools/day or dehydration: urgent review	☐ Collapse / severe dehydration: 112/999

Dates / doses missed or changed / symptoms affecting daily life / questions:

Red flags override the table. Fever, shivers, suddenly unwell, chest symptoms or inability to drink: seek prompt advice. Severe breathing difficulty, collapse or severe chest pain: 112 / 999.
