NCCP 00642 · clinician draft

Lutetium-177 oxodotreotide (Lutathera / PRRT)

Specialist receptor-targeted radiation treatment This guide covers the Irish NCCP G1/G2 SSTR-positive GEP-NET regimen. A receptor scan, specialist eligibility review and individual radiation-safety plan are required.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **PRRT administration with kidney protection** — Moderate
  Lutetium-177 oxodotreotide + Lysine / arginine amino acids
