BASELINE → TREATMENT → FOLLOW-UP

When checks happen

Milestones are not equal time intervals. Your team books and reviews tests. Blood count, kidney and liver tests are checked before each cycle. The team confirms the kidney-function method, current AUC and previous dose changes. Report numbness, hearing changes, infection and bleeding. Additional tests follow symptoms and the individual plan.

Check	Before starting	Early treatment	Ongoing treatment	Dose change / pause	Next decision
Blood / kidney / liver	Baseline blood and organ tests	Before cycle; extra tests if needed	Review blood tests and renal dosing each cycle	Review recovery and current dose	Follow unresolved abnormalities
Symptoms / medicines	Platinum allergy / hearing / nerve review	Report early symptoms and support problems	Review all medicines and side effects	Do not restart or escalate yourself	Agree continuation and response assessment
Special schedule check	Confirm AUC and kidney method	Renal tests and prescribed antiemetics	21-day review pattern	Keep previous dose / nadir history	Personal plan; no booked dates implied

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00261 v7 · official regimen · Current Irish product information · safety supplement

THE WHOLE TREATMENT JOURNEY

Carboplatin · 21-day breast schedule: treatment and checks

Advanced breast cancer

Carboplatin is infused on Day 1 of each 21-day cycle. The team selects the dose using the prescribed AUC and kidney function. Treatment continues while helpful and tolerated; there is no fixed breast course length.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before starting	Early treatment	Ongoing treatment	Dose change / pause	Next decision
Treatment plan NCCP 00261	Confirm breast plan and current dose	Day 1 every 21 days	Continue while helpful and tolerated	Review dose and recovery before restart	Agree continuation / next treatment
Blood / kidney / liver NCCP 00261 · SMPC	Baseline blood and organ tests	Before cycle; extra tests if needed	Review blood tests and renal dosing each cycle	Review recovery and current dose	Follow unresolved abnormalities
Symptoms / medicines NCCP 00261 · SMPC	Platinum allergy / hearing / nerve review	Report early symptoms and support problems	Review all medicines and side effects	Do not restart or escalate yourself	Agree continuation and response assessment
Special schedule check NCCP 00261 · SMPC	Confirm AUC and kidney method	Renal tests and prescribed antiemetics	21-day review pattern	Keep previous dose / nadir history	Personal plan; no booked dates implied

What each check is for

1 Treatment and dose review

Before every administration

Blood count, kidney and liver tests are checked before each cycle. The team confirms the kidney-function method, current AUC and previous dose changes. Report numbness, hearing changes, infection and bleeding. Additional tests follow symptoms and the individual plan.

Ask / act: The treating team confirms results, dose and suitability; this map does not authorise treatment.

2 Support and symptoms

Throughout treatment, including days at home

Contact the oncology emergency service immediately for fever or shaking chills, sudden illness, bleeding, new breathlessness, chest pain or severe allergy. Report reduced urine, hearing changes and new numbness promptly. Do not wait for the next visit.

Ask / act: Keep a written medicine plan and urgent-contact route.

3 Response and continuation

At agreed clinical review points

Aim to slow or shrink metastatic breast cancer and help symptoms, balancing possible benefit, side effects and treatment burden.

Ask / act: Discuss benefit, toxicity and priorities before continuing or changing treatment.

Sources: NCCP 00261 · TRIAL

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
