National Cancer Control Programme (NCCP) 00455 · clinician draft

Pembrolizumab · every 3 weeks · melanoma before and after surgery

Your diagnosis and treatment setting Selected stage IIIB melanoma eligible for the NCCP adjuvant indication: the treating clinician may choose pembrolizumab 200 mg before and after surgery. This is a distinct, discretionary perioperative plan.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Before surgery** — Minimal
  Pembrolizumab
- **After surgery** — Minimal
  Pembrolizumab
