National Cancer Control Programme (NCCP) 00558 · clinician draft

Pembrolizumab · every 6 weeks · adjuvant melanoma

Your diagnosis and treatment setting Completely resected stage IIB/IIC or stage III cutaneous melanoma; the team confirms the applicable NCCP indication and timing.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Adjuvant treatment after surgery** — Minimal
  Pembrolizumab
