NCCP 00102 · clinician draft

Vemurafenib alone — advanced melanoma

The treatment this guide covers This is vemurafenib monotherapy. It is not the cobimetinib combination and has no cobimetinib seven-day break. The team must plan any radiotherapy because BRAF treatment can increase radiation-related reactions.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Vemurafenib alone — advanced melanoma · support plan** — Minimal per NCCP 00102 v6; do not replace with the combination classification
  Vemurafenib
