NCCP 00464 · clinician draft

Dacarbazine — metastatic melanoma

> **The treatment this guide covers** This is single-agent dacarbazine at the NCCP 850 mg/m² dose. It is not an immune-checkpoint or BRAF-targeted regimen. Historical studies often used 1000 mg/m² and different treatment settings; their response or survival figures are not a precise forecast for this 850 mg/m² course.
>
> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Dacarbazine — metastatic melanoma · support plan** — High per NCCP 00464 v3; preventive antiemetic regimen required under local policy
  Dacarbazine
