NCCP 00551 · clinician draft

Nivolumab 3 mg/kg + ipilimumab 1 mg/kg — advanced melanoma

The treatment this guide covers NCCP identifies nivolumab 3 mg/kg plus ipilimumab 1 mg/kg for melanoma as an unlicensed dosing posology in Ireland, despite reimbursement. Your clinician should explain this, the available alternatives and uncertainties, document informed consent under hospital policy, and follow the hospital Drug and Therapeutics Committee or equivalent acknowledgement process. CheckMate 511 primarily compared safety; it did not prove that this schedule has equal survival benefit to nivolumab 1 mg/kg plus ipilimumab 3 mg/kg.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Melanoma · combination induction · up to four doses** — Low
  Nivolumab + Ipilimumab
- **Melanoma · nivolumab maintenance** — Minimal
  Nivolumab
