Pemetrexed monotherapy

NCCP 00222 - Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Pemetrexed

Schedule to confirm with my team

Day 1: Pemetrexed 500 mg/m² by IV infusion.

Every 21 days: Treatment repeats every 21 days if review and blood tests allow.

During treatment: Take folic acid as prescribed; vitamin B12 support and steroid rash prophylaxis are part of pemetrexed care.

Duration: For maintenance/second-line use, treatment may continue until disease progression or unacceptable toxicity, according to the treatment plan.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.

Pemetrexed monotherapy

NCCP 00222 - Cycle 1

Cycle number: _____ Start date: _____ Review date: _____

Current medicines / dose changes: _____

Record the worst symptom in each interval: dates, number of episodes/readings and effect on daily activities. A blank cell means not recorded, not "no symptom".

Symptoms / body area	Days 1-7	Days 8-14	Days 15-21
Blood / infection			
Kidneys			
Mouth / bowel			
Skin			
Breathing			
Energy / daily function			
Other symptoms			

What happened / what it stopped me doing

Advice received, action taken and follow-up

Call oncology promptly about new or worsening symptoms. Bring this record and your current medicines to review.

Pemetrexed monotherapy
