BASELINE → TREATMENT → FOLLOW-UP

Treatment checks across the course

Relative stages, not equally spaced dates. Agree who books each check, reviews results and gives advice if a check is missed.

Check	Before starting	First treatment	During treatment	Phase / dose review	After treatment
Bloods and symptoms	Baseline blood count, kidney and liver checks	Confirm tests and prescription before the first dose	Repeat bloods and symptom checks according to this regimen	Recheck after a hold or treatment change	Follow unresolved effects and the agreed disease-review plan
Treatment review	Confirm exact cancer setting and biomarkers	Explain expected benefit and how it will be assessed	Report new symptoms between visits	Review response, tolerability and active medicines	Agree the next treatment or surveillance plan
Electrolytes and EGFR effects	Check electrolyte and skin-risk plan	Skin care and prompt reaction reporting	Monitor magnesium, calcium, potassium, skin and eyes	Do not stop follow-up because the infusion stops	Monthly electrolytes, magnesium and calcium for two months after the last EGFR-antibody dose

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00447 v7 · official regimen

THE WHOLE TREATMENT JOURNEY

Panitumumab + modified FOLFOX-6: treatment and checks

First-line RAS wild-type metastatic colorectal cancer

A 14-day cycle: panitumumab, oxaliplatin, folinic acid and fluorouracil start on Day 1, followed by a fluorouracil pump lasting about 46 hours. Arrange disconnection around Day 3. Continue according to benefit and tolerance.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before starting	First treatment	During treatment	Phase / dose review	After treatment
Treatment NCCP 00447	Confirm exact indication and planned course	Start the source-specific schedule	Continue the active phase as prescribed	Confirm hold, restart, maintenance or completion	Agree follow-up and next decision
Bloods and symptoms NCCP 00447	Baseline blood count, kidney and liver checks	Confirm tests and prescription before the first dose	Repeat bloods and symptom checks according to this regimen	Recheck after a hold or treatment change	Follow unresolved effects and the agreed disease-review plan
Treatment review NCCP 00447	Confirm exact cancer setting and biomarkers	Explain expected benefit and how it will be assessed	Report new symptoms between visits	Review response, tolerability and active medicines	Agree the next treatment or surveillance plan
Electrolytes and EGFR effects NCCP 00447	Check electrolyte and skin-risk plan	Skin care and prompt reaction reporting	Monitor magnesium, calcium, potassium, skin and eyes	Do not stop follow-up because the infusion stops	Monthly electrolytes, magnesium and calcium for two months after the last EGFR-antibody dose

What each check is for

1 Before starting

Before first dose

Confirm suitability and baseline safety

Ask / act: Confirm results, prescriptions and responsible teams.

Sources: NCCP 00447

2 Whole-course and completion review

At phase change or completion

Some checks and support continue after a drug stops

Ask / act: Provide the ongoing monitoring and urgent-contact plan.

Sources: NCCP 00447

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
