Pemetrexed + cisplatin

NCCP 00317 - Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Pemetrexed - Cisplatin

Schedule to confirm with my team

Day 1: Pemetrexed 500 mg/m² IV, followed by cisplatin 75 mg/m² IV with pre- and post-hydration.

Every 21 days: Treatment repeats every 21 days.

Mesothelioma: Usually up to 4-6 cycles unless progression or unacceptable toxicity occurs.

NSCLC: Usually 4-6 cycles, then maintenance pemetrexed (NCCP 00222) where appropriate.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.

Pemetrexed + cisplatin

NCCP 00317 - Cycle 1

Cycle number: _____ Start date: _____ Review date: _____

Current medicines / dose changes: _____

Record the worst symptom in each interval: dates, number of episodes/readings and effect on daily activities. A blank cell means not recorded, not "no symptom".

Symptoms / body area	Days 1-7	Days 8-14	Days 15-21
Blood / infection			
Kidneys / hydration			
Hearing / tinnitus			
Nerves			
Nausea / vomiting			
Mouth / bowel			
Skin			
Electrolytes / whole-body symptoms			

What happened / what it stopped me doing

Advice received, action taken and follow-up

Call oncology promptly about new or worsening symptoms. Bring this record and your current medicines to review.

Pemetrexed + cisplatin
