SACTCHECK / PATIENT TREATMENT PASSPORT

Nivolumab + ipilimumab + pemetrexed + cisplatin

NCCP 00714 - Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Nivolumab - Ipilimumab - Pemetrexed - Cisplatin

Schedule to confirm with my team

Cycle 1 - day 1: Nivolumab + ipilimumab + pemetrexed + cisplatin.

Cycle 1 - day 22: Nivolumab + pemetrexed + cisplatin.

After cycle 1: Continue nivolumab on days 1 and 22 and ipilimumab on day 1 of each 42-day cycle.

Duration: Immunotherapy continues until progression/unacceptable toxicity or up to 24 months in patients without progression, according to the NCCP source.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.

Nivolumab + ipilimumab + pemetrexed + cisplatin

NCCP 00714 - Cycle 1

Cycle number: _____ Start date: _____ Review date: _____

Current medicines / dose changes: _____

Record the worst symptom in each interval: dates, number of episodes/readings and effect on daily activities. A blank cell means not recorded, not "no symptom".

Symptoms / body area	Days 1-14	Days 15-28	Days 29-42
Hormones / brain			
Lungs			
Heart / muscles			
Liver / bowel			
Kidneys / hydration			
Hearing / nerves			
Blood / infection			
Nausea / mouth			

What happened / what it stopped me doing

Advice received, action taken and follow-up

Call oncology promptly about new or worsening symptoms. Bring this record and your current medicines to review.

Nivolumab + ipilimumab + pemetrexed + cisplatin

NCCP 00714 - Cycle 2
