NCCP 00831 · clinician draft

Atezolizumab + bevacizumab for HCC

> **Treatment scope · NCCP 00831** This is the HCC combination, not atezolizumab alone or a lung-cancer chemotherapy combination. Existing liver disease and bleeding risk need review alongside possible immune side effects. Your team assesses each medicine separately.
>
> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Atezolizumab IV/SC + bevacizumab IV** — Minimal atezolizumab + bevacizumab
