Ribociclib + endocrine therapy · metastatic

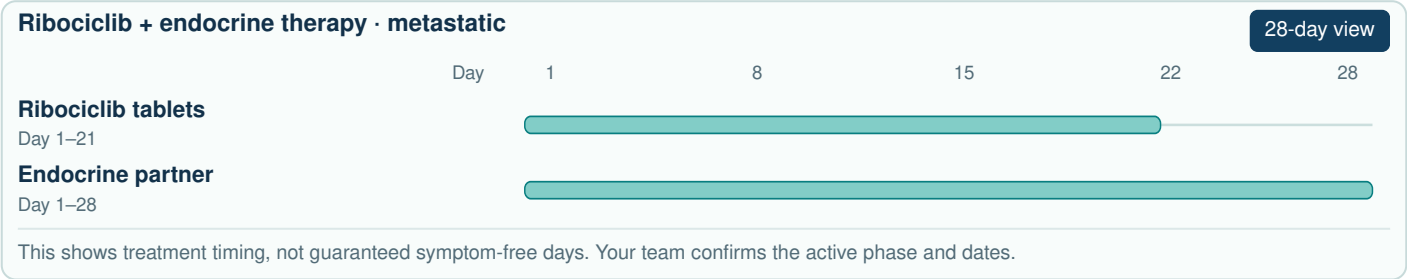

Ribociclib with endocrine treatment to control advanced breast cancer.

HR-positive / HER2-negative metastatic breast cancer · NCCP 00525 v6 · Document revised 4 November 2026

Your personal plan: this is the standard regimen schedule. Your team confirms your prescribed doses, cycles, treatment changes and appointments in your written plan.

My overall treatment

Ribociclib daily on Days 1–21, then seven days off. Endocrine treatment follows its own schedule. Continue while beneficial and tolerated.

Days 1–21
Take prescribed ribociclib; continue endocrine treatment.

Days 22–28
No planned ribociclib; endocrine treatment continues.

A typical 28-day cycle

Day 1–28
Follow the phase and prescribed schedule

Timing may change after review. Side effects can occur on any day; there are no guaranteed safe days.

My tests and checks

When	What is checked	Timing / reason
Before	**Bloods, electrolytes and electrocardiogram (ECG)** Required by regimen	Before starting
Cycles 1–6	**Blood count, kidneys and liver** Required by regimen	Every two weeks in cycles 1–2; before cycles 3–6
During	**Electrolytes and ECG** Required by regimen	Electrolytes before cycles 1–6; ECG at cycle 1 Day 14
Later / review	**Bloods, ECG and response assessment** Team-agreed plan	Further tests as indicated; scans follow your plan

Between treatments

- Report fever, fainting, palpitations or new breathing symptoms.

Confirm the endocrine partner and injection appointments; do not replace missed doses.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321

EXAMPLE ONLY — team must replace both numbers before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.

What to watch for

You do not need to know which medicine caused a symptom before calling.

1 Heart rhythm / QT

Ribociclib

Baseline ECG and an ECG around Cycle 1 Day 14. Fainting or palpitations need urgent advice.

3 Low neutrophils / infection

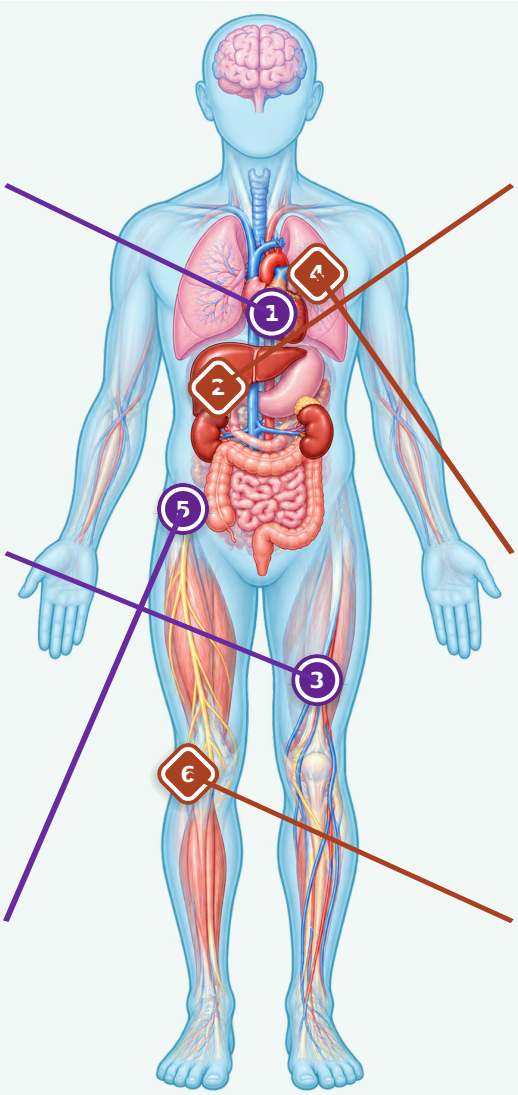

Ribociclib

Blood counts guide whether the next cycle can start. Fever, shivers or sudden illness: contact oncology immediately.

5 Severe rash or blistering

Ribociclib

A widespread painful rash, blisters or peeling skin needs urgent assessment.

2 Liver injury

Ribociclib

Keep liver blood tests. Yellow skin / eyes, dark urine or marked upper-abdominal discomfort: call promptly.

4 Lung inflammation

Ribociclib · uncommon but important

New cough or breathlessness needs prompt assessment, even between visits.

6 Joints and bone health

Aromatase inhibitor / ovarian suppression

Discuss joint symptoms and keep the agreed bone-risk and DXA plan.

Selected effects, not every possible effect or a prediction. Blood-count, skin and line markers are schematic. Number and text carry meaning; colour is decorative.

Report new breathlessness, chest symptoms, severe diarrhoea, inability to drink, jaundice, a painful swollen leg or a severe rash promptly. You do not need to identify which medicine caused the symptom.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

My Treatment Card

SACTCheck

Name: _____

Ribociclib + endocrine therapy

Ribociclib Days 1–21 of 28; endocrine partner has a separate continuing schedule.

Phase: _____ Cycle plan: team to confirm

Daytime (EXAMPLE) 087 12345678

Out of hours (EXAMPLE) 087 87654321

Unwell or fever? Call oncology now.
Severe breathing difficulty, chest pain or collapse: **112 / 999.**

EXAMPLE NUMBERS — replace before patient use.

CUT outer border

BACK / TREATMENT RECORD

My cycle record

Rolling record — follow your agreed treatment plan.

Cycle	Date / initials

My treatment information

Latest treatment date: _____

Plan changed? Ask the team to update this card.

FOLD centre — do not cut

Keep the record accurate

The team dates and initials each recorded treatment unit when complete. A cycle is complete after its final planned dose; a weekly-treatment stamp records that weekly dose. Delays, omitted doses or a changed plan need a note or a replacement card. A stamp does not approve the next treatment. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.

Your local contacts and resources
