BASELINE → TREATMENT → FOLLOW-UP

When checks happen

The columns show order, not equal periods. There is no fixed number of cycles for these plans. Agree who books each check, when results are reviewed and whom to contact if a check is missed.

Check	Before starting	Early treatment	Repeated treatment	Longer-term review	Pause / completion
Blood count, kidney and liver	Baseline blood count, kidney and liver profile	Review results and symptoms before treatment	Regular tests as arranged by the team	Repeat sooner if unwell or results need follow-up	Follow unresolved abnormalities after treatment
Magnesium, calcium and potassium	Check mineral levels before starting	Repeat periodically during treatment	Keep blood-test and replacement appointments	More checks may be needed if levels fall or diarrhoea develops	Monthly checks for two months after the last antibody dose
Skin, nails, eyes and breathing	Discuss existing skin, eye or lung problems	Start the prescribed skin-care plan; report reactions early	Review skin, nails, diarrhoea and new symptoms	Eye pain, worsening breathing or severe rash needs prompt assessment	Continue care until symptoms and mineral levels settle
Cancer response and treatment choices	Record baseline disease and agree review plan	Bring forward review if symptoms worsen	Scans and other tests follow your consultant's treatment plan	Discuss benefit, side effects and whether the goal has changed	Agree continuation, a break, another treatment or supportive care

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. National Cancer Control Programme (NCCP) 00732 v2 · current official regimen checked 5 November 2026 · EMA: Erbitux product information and patient leaflet

Tests in your plan

Carcinoembryonic antigen (CEA) — colorectal plans

If part of your plan

WHEN

For a colorectal cancer plan, if your team uses CEA; your team sets the interval.

A marker trend interpreted alongside symptoms, examination and scans.

Record the baseline, latest result and next date. A marker change alone does not establish progression.

THE WHOLE TREATMENT JOURNEY

Cetuximab · every two weeks: treatment and checks

Advanced / metastatic colorectal cancer

Cetuximab on Day 1 every 14 days while beneficial and tolerable. No Day 8 cetuximab or home chemotherapy pump is scheduled.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before starting	Early treatment	Repeated treatment	Longer-term review	Pause / completion
Blood count, kidney and liver NCCP 00732	Baseline blood count, kidney and liver profile	Review results and symptoms before treatment	Regular tests as arranged by the team	Repeat sooner if unwell or results need follow-up	Follow unresolved abnormalities after treatment
Magnesium, calcium and potassium NCCP 00732	Check mineral levels before starting	Repeat periodically during treatment	Keep blood-test and replacement appointments	More checks may be needed if levels fall or diarrhoea develops	Monthly checks for two months after the last antibody dose
Skin, nails, eyes and breathing NCCP 00732	Discuss existing skin, eye or lung problems	Start the prescribed skin-care plan; report reactions early	Review skin, nails, diarrhoea and new symptoms	Eye pain, worsening breathing or severe rash needs prompt assessment	Continue care until symptoms and mineral levels settle
Cancer response and treatment choices NCCP 00732	Record baseline disease and agree review plan	Bring forward review if symptoms worsen	Scans and other tests follow your consultant's treatment plan	Discuss benefit, side effects and whether the goal has changed	Agree continuation, a break, another treatment or supportive care

What each check is for

1 A 14-day reference cycle

Clinic → home → review

The aim is to control advanced bowel cancer and symptoms. Treatment continues while it is helping and side effects remain acceptable; your team reviews the plan with you.

Ask / act: Confirm the current phase, prescription, tests and support medicines.

Sources: NCCP 00732

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
