National Cancer Control Programme (NCCP) 00316 · clinician draft

Dose-dense AC → fortnightly paclitaxel + weekly trastuzumab

> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Day 8 of the taxane block · trastuzumab only

Active medicines: Trastuzumab

Emetogenic risk: Minimal

No routine prophylactic antiemetic order is populated for this phase. Agree an individual symptom-treatment plan where needed.

Additional phase-specific support

- Paclitaxel is not due on this Day 8. Do not repeat paclitaxel premedicines or its antiemetic order.
- Continue the weekly trastuzumab schedule and cardiac plan; this is not yet the q21-day continuation phase.

Before signing: verify allergies, current medicines, interactions, renal / hepatic function, QT risk, sedation, prior response, total steroid exposure and the rescue-medicine duration. Do not duplicate medicines from another phase.

Individual changes / rescue duration: _____
Prescriber / date: _____ Pharmacy review: _____
