National Cancer Control Programme (NCCP) 00339 · clinician draft

Vinorelbine and cisplatin · 21-day cycle

> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Vinorelbine-only day: 8/15

Active medicines: vinorelbine

Emetogenic risk: Minimal

No routine prophylactic antiemetic order is populated for this phase. Agree an individual symptom-treatment plan where needed.

Additional phase-specific support

- No routine antiemetic prophylaxis for minimal risk; individualise rescue medicines.
- Continue the prescribed constipation plan. Do not restart the full cisplatin antiemetic course automatically.

Before signing: verify allergies, current medicines, interactions, renal / hepatic function, QT risk, sedation, prior response, total steroid exposure and the rescue-medicine duration. Do not duplicate medicines from another phase.

Individual changes / rescue duration: _____
Prescriber / date: _____ Pharmacy review: _____
