National Cancer Control Programme (NCCP) 00689 · clinician draft

Atezolizumab + carboplatin + etoposide

> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Maintenance · atezolizumab only

Active medicines: atezolizumab

Emetogenic risk: Minimal

No routine prophylactic antiemetic order is populated for this phase. Agree an individual symptom-treatment plan where needed.

Additional phase-specific support

- No routine chemotherapy antiemetic/steroid prophylaxis; provide an individual rescue plan if needed.
- Review the need for previous supportive prescriptions; do not stop required endocrine replacement or a therapeutic steroid taper without instruction.
- Continue alert card, cycle bloods, thyroid checks and prompt immune-symptom reporting.

Before signing: verify allergies, current medicines, interactions, renal / hepatic function, QT risk, sedation, prior response, total steroid exposure and the rescue-medicine duration. Do not duplicate medicines from another phase.

Individual changes / rescue duration: _____
Prescriber / date: _____ Pharmacy review: _____
