SACTCHECK · TREATMENT PASSPORT

Cisplatin, Iomustine and vincristine (CLV)

A record of what you experience

One cycle per page. Each medicine has its own symptom table. Mark the worst symptoms since your last review, when they occurred and what they stopped you doing. Overlapping symptoms can be recorded under more than one medicine; you do not have to identify the cause.

These are patient-language severity prompts, not a validated questionnaire or a formal Common Terminology Criteria for Adverse Events (CTCAE) grading tool. Your team assigns the clinical grade. Serious symptoms override the columns: call without waiting to decide a severity level.

Start four to six weeks after craniospinal radiotherapy, once cleared by your team. In each 42-day cycle, Iomustine is taken once on Day 1, cisplatin is infused on Day 1, and vincristine is infused on Days 1, 8 and 15. Eight cycles are planned, with individual safety review.

These pages are reusable recording sheets; the prescribed course length is stated above. Ask for additional sheets as needed.

Emergency: 112 / 999. Severe breathing difficulty, collapse, seizure or severe chest pain needs emergency help.

Contact oncology immediately for temperature ≥37.5°C or ≤36°C, shivering or suddenly feeling unwell, even with a normal temperature. Follow your own hospital's instructions. If you cannot reach the team, seek urgent medical assessment.

Full patient information, sources and visual timeline. No identifiers are encoded.

Source reconciled; independent clinical, pharmacy and patient/PPI review pending

My diagnosis, plan and medicines

Complete these pages with your team. Leave unknown or inapplicable items blank. This record supports the consent discussion and your written prescription.

Diagnosis and plan

Exact embryonal tumour diagnosis, site and pathology date

Risk group and reasons; molecular subgroup if known or pending

Surgery / brain and spine assessment / craniospinal radiotherapy (RT) dates

CLV start window and actual start; cycle / day / planned eight cycles

Treatment goal, priorities, lead team and chosen support person

Medicines and safety

Lomustine Day 1 once; cisplatin Day 1; vincristine Days 1, 8 and 15

Hydration / electrolytes / anti-sickness and bowel instructions

Steroid / seizure plan if prescribed; interaction review

Hearing / nerve / lung baseline and any changes

Urgent contacts, medicine-checking help and treatment held

SACTCheck patient information. Your team confirms your personal plan. The treatment reference collects the clinical and medicine sources.

My scans, symptoms and support

Record what each test is checking and when the result will be discussed. Scan changes need interpretation alongside symptoms and treatment timing.

Test and purpose	Date / booking contact	Result discussion	Agreed next step

Symptoms and support

Headache / balance / walking / strength / speech changes

Hearing / tinnitus / numbness / hand function / constipation

Fatigue / mood / memory / daily tasks / eating and drinking

Rehabilitation, practical help and carer needs

My questions and agreed next steps

My urgent contact plan / what my carer should do

SACTCheck patient information. Your team confirms your personal plan. The treatment reference collects the clinical and medicine sources.

Cisplatin, lomustine and vincristine (CLV)

Cycle number: _____ Start date: _____ Next review: _____

Record the cycle number, exact treatment day, medicines actually received or held, safety tests and symptom changes. A card stamp records treatment; it does not authorise the next dose.

CLV · lomustine/cisplatin D1, vincristine D1, D8 and D15 · copy this sheet for another cycle of the same phase.

Lomustine · Oral chemotherapy capsule

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Nausea	□ None	□ Queasy but eating and drinking	□ Intake reduced: contact the team	□ Unable to maintain intake: urgent review	□ Collapse / severe dehydration: 112/999
Fatigue	□ Usual energy	□ Tiredness improves with rest	□ Rest does not help; usual tasks affected: call	□ Self-care difficult: urgent review	□ Collapse: 112/999
Breathing / cough	□ Usual breathing	□ New cough or breathlessness: call promptly	□ Symptoms with usual activity: urgent review	□ Breathless at rest: urgent assessment	□ Severe breathing difficulty / collapse: 112/999

Cisplatin · Chemotherapy infusion into a vein

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Nausea	□ None	□ Queasy but eating and drinking	□ Intake reduced: contact the team	□ Unable to maintain intake: urgent review	□ Collapse / severe dehydration: 112/999
Hearing changes	□ No change	□ New ringing or muffled hearing: report promptly	□ Conversation difficult: contact the team	□ Sudden hearing loss: urgent assessment	□ Sudden weakness or collapse: 112/999
Numbness / tingling	□ None	□ Mild change; usual tasks unaffected	□ Limits buttons, writing or walking: call	□ Washing, dressing or walking difficult: urgent review	□ Sudden major weakness / paralysis: emergency help

Vincristine · Chemotherapy given into a vein

Symptom	None	Mild	Moderate / call	Severe / urgent	Emergency signs
Numbness / tingling	□ None	□ Mild change; usual tasks unaffected	□ Limits buttons, writing or walking: call	□ Washing, dressing or walking difficult: urgent review	□ Sudden major weakness / paralysis: emergency help
Constipation	□ Usual bowel pattern	□ Mild change: follow the agreed bowel plan	□ Persistent constipation or discomfort: contact the team	□ Pain, vomiting or no stool/wind: urgent assessment	□ Collapse or severe sudden illness: emergency help

Dates / doses missed or changed / symptoms affecting daily life / questions:

Red flags override the table. Fever, shivers, suddenly unwell, chest symptoms or inability to drink: seek prompt advice. Severe breathing difficulty, collapse or severe chest pain: 112 / 999.
