Carboplatin · 21-day breast schedule

Aim to slow or shrink metastatic breast cancer and help symptoms, balancing possible benefit, side effects and treatment burden.

Advanced breast cancer · NCCP 00261 v7 · Document revised 9 November 2026

Your personal plan: this is the standard regimen schedule. Your team confirms your prescribed doses, cycles, treatment changes and appointments in your written plan.

My overall treatment

Carboplatin on Day 1 every 21 days. Your team reviews benefit and safety; there is no preset breast-treatment cycle total.

21 day view

Treatment timing in this window

intravenous (IV) treatment · Day 1 — Day 1

Carboplatin for metastatic breast cancer

Carboplatin is given through a vein over about 30 minutes after blood and symptom review and prescribed anti-sickness medicines. The complete appointment takes longer. A cannula or existing line may be used; a port is not automatically required.

A typical 21-day cycle

Day 1–21

One reference cycle

Timing may change after review. Side effects can occur on any day; there are no guaranteed safe days.

My tests and checks

When	What is checked	Timing / reason
Before	**Baseline tests and prescription** NCCP	Blood count, kidney and liver tests; confirm the kidney-function method, prescribed AUC, previous platinum effects and medicine list.
Each cycle	**Blood results and symptoms** NCCP	Blood count, kidney and liver tests before every cycle. For a calculated kidney estimate, creatinine must be from within 48 hours before treatment.
Between / after	**Recovery and response** NCCP / individual plan	Report infection, bleeding, hearing or nerve changes. Scans and further tests follow your individual plan; no routine heart-scan interval is specified.

Between treatments

- Take anti-sickness medicines as prescribed, including any days after the infusion.
- Low blood counts and other effects can occur between visits; the timeline does not identify safe days.
- Report fever, chills, bleeding or sudden illness immediately. Do not wait for your next appointment.

Bring the actual urgent contacts, medicine list and prescribed anti-sickness plan. Discuss the off-label breast indication, expected benefit, alternatives and fertility before treatment.

When to get help

Call 112 / 999 for severe breathing difficulty, severe chest pain, collapse or a seizure.

Call oncology immediately: temperature 37.5°C or above, 36°C or below, shivering or suddenly feeling unwell, even with a normal temperature. Follow your hospital's temperature instructions. If you cannot reach the team, seek urgent medical assessment. Do not wait for the next appointment.

Oncology daytime: 087 12345678 · **Out of hours:** 087 87654321

EXAMPLE ONLY — team must replace both numbers before patient use.

Feasibility build. Clinical, pharmacy and patient/PPI review pending. Your team confirms your personal plan.

What to watch for

You do not need to know which medicine caused a symptom before calling.

1 Blood / infection

Carboplatin

Fever, unusual bruising or bleeding needs urgent advice.

2 Kidneys / urine

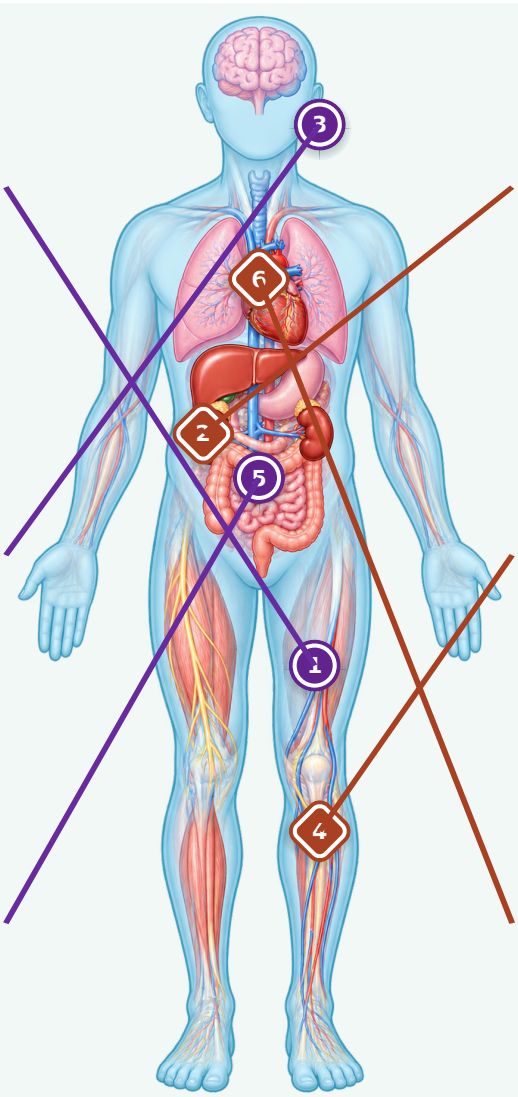

Carboplatin

Keep kidney tests and report reduced urine or swelling.

3 Hearing

Carboplatin

Report ringing in the ears or hearing changes.

4 Hands / feet

Carboplatin

Report tingling, numbness or altered balance early.

5 Nausea / appetite

Carboplatin

Follow the prevention plan; call if vomiting prevents fluids.

6 Allergic reaction

Carboplatin

During an infusion, report rash, chest tightness or breathlessness immediately.

Selected effects, not every possible effect or a prediction. Blood-count, skin and line markers are schematic. Number and text carry meaning; colour is decorative.

Contact the oncology emergency service immediately for fever or shaking chills, sudden illness, bleeding, new breathlessness, chest pain or severe allergy. Report reduced urine, hearing changes and new numbness promptly. Do not wait for the next visit.

Daytime (EXAMPLE) 087 12345678

Out of hours (EXAMPLE) 087 87654321

Unwell or fever? Call oncology now.
Severe breathing difficulty, chest pain or collapse: **112 / 999.**

EXAMPLE NUMBERS — replace before patient use.

BACK / TREATMENT RECORD

My cycle record

Rolling record; this card does not set the number of cycles.

Cycle	Date / initials

My treatment information

Latest treatment date: _____

Plan changed? Ask the team to update this card.

CUT outer border

FOLD centre — do not cut

Keep the record accurate

The team dates and initials each recorded treatment unit when complete. A cycle is complete after its final planned dose; a weekly-treatment stamp records that weekly dose. Delays, omitted doses or a changed plan need a note or a replacement card. A stamp does not approve the next treatment. Keep any medicine-specific alert card too.

Put your treatment page on your phone

Scan your QR and check the treatment name. Save that page to your home screen.

iPhone / Safari

Tap Share → Add to Home Screen. Select Open as Web App if offered, then Add.

Android / Chrome

Tap the three-dot menu → Add to Home screen or Install and create shortcut. Choose the shortcut option and confirm.

Menu wording varies. The QR opens information, not a personal record. Paper stamps do not update the website. Check that the saved icon opens the correct treatment.

Your local contacts and resources
