BASELINE → TREATMENT → FOLLOW-UP

Treatment and checks

Relative sequence; exact visits and tests are prescribed individually.

Check	Before treatment	Day 1	Day 8	At home	Next-cycle review	End-of-course review
Treatment	Confirm both drugs	Gemcitabine + carboplatin	Gemcitabine only	No routine dose	Repeat if prescribed	Agree next plan
Blood tests	FBC, renal/liver	FBC, renal/liver	FBC, renal profile	Extra tests if needed	Repeat safety tests	Follow unresolved changes
Symptoms and organs	Fitness, hearing, nerves	Review new symptoms	Review new symptoms	Call promptly when unwell	Hearing/nerve assessment	Follow lasting effects
Support and response	Consent and contact plan	Day 1 anti-sickness plan	Day 8 support plan	Take prescribed support	Review benefit and tolerance	Consultant-directed imaging

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00310 v8 · official regimen

THE WHOLE TREATMENT JOURNEY

Gemcitabine and carboplatin · lung cancer: treatment and checks

Advanced non-small-cell lung cancer · standalone chemotherapy

A cycle lasts 21 days (3 weeks). Day 1: gemcitabine and carboplatin. Day 8: gemcitabine alone after separate blood tests and review. Days 9–21: no scheduled chemotherapy. The usual planned course is 4–6 cycles, with earlier changes for progression or unacceptable effects.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before treatment	Day 1	Day 8	At home	Next-cycle review	End-of-course review
Treatment NCCP 00310	Confirm both drugs	Gemcitabine + carboplatin	Gemcitabine only	No routine dose	Repeat if prescribed	Agree next plan

Support and response NCCP 00310	Consent and contact plan	Day 1 anti-sickness plan	Day 8 support plan	Take prescribed support	Review benefit and tolerance	Consultant-directed imaging

What each check is for

1 Prepare

Before first dose

Confirm a suitable individual plan

Ask / act: Confirm treatment aim, consent, blood tests and contacts.

Sources: NCCP 00310

2 Each visit

Days 1 and 8

Dose clearance can change

Ask / act: Review symptoms and the correct treatment-day rules.

Sources: NCCP 00310

3 Progress review

As directed by the consultant

Assess benefit as well as toxicity

Ask / act: Agree scan timing and next treatment decision.

Sources: NCCP 00310

4 End of course

Usually after 4–6 cycles or earlier if needed

Plan continuing care

Ask / act: Agree ongoing support, next treatment and contacts.

Sources: NCCP 00310

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
