NCCP 00271 · clinician draft

Carboplatin + Etoposide

Which treatment this guide covers This guide covers Carboplatin + Etoposide chemotherapy for extensive-stage small-cell lung cancer. Immunotherapy combinations and limited-stage treatment with radiotherapy use separate regimens. If an additional medicine or radiotherapy is prescribed, obtain its own plan and consent information.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Carboplatin + Etoposide · standard three-day course** — high carboplatin + etoposide
