BASELINE → TREATMENT → FOLLOW-UP

Your treatment and checks

Relative stages, not equal time intervals. There is no routine heart-scan schedule in this regimen.

Check	Preparation	Cycle 1	Cycle 2	Cycle 3	Cycle 4	After treatment
Treatment	Confirm goal and consent	21-day schedule	Repeat if appropriate	Review benefit and effects	Final planned cycle	Agree next plan
Blood tests	Blood count, kidneys, liver	Blood count weekly	Kidneys/liver before cycle	Continue weekly blood count	Review recovery	Follow abnormalities
Hearing / nerves / bowels	Record baseline symptoms	Ask before each dose	Report any change	Adjust if needed	Document lasting effects	Follow symptoms until resolved
Scans / other treatment	Stage and MDT plan	As individually planned	No universal scan date	Consultant review	End-of-course review	Surveillance or next treatment

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00339 v7 · official regimen

THE WHOLE TREATMENT JOURNEY

Vinorelbine and cisplatin · 21-day cycle: treatment and checks

Postoperative adjuvant or advanced/recurrent NSCLC: confirm your treatment goal

A cycle lasts 21 days (3 weeks). Vinorelbine is given on Days 1, 8, 15. Cisplatin is given on Day 1. Four cycles are planned, with review before doses. Delays or omitted doses may be needed for safety.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Preparation	Cycle 1	Cycle 2	Cycle 3	Cycle 4	After treatment
Treatment NCCP 00339	Confirm goal and consent	21-day schedule	Repeat if appropriate	Review benefit and effects	Final planned cycle	Agree next plan
Blood tests NCCP 00339	Blood count, kidneys, liver	Blood count weekly	Kidneys/liver before cycle	Continue weekly blood count	Review recovery	Follow abnormalities
Hearing / nerves / bowels NCCP 00339	Record baseline symptoms	Ask before each dose	Report any change	Adjust if needed	Document lasting effects	Follow symptoms until resolved
Scans / other treatment NCCP 00339	Stage and MDT plan	As individually planned	No universal scan date	Consultant review	End-of-course review	Surveillance or next treatment

What each check is for

1 Preparation

Before cycle 1

Confirm treatment goal

Ask / act: Document adjuvant versus advanced goal and contact details.

Sources: NCCP 00339

2 Weekly review

Before weekly vinorelbine

Counts and symptoms can change

Ask / act: Review source-specific day/count/history actions.

Sources: NCCP 00339

3 Cisplatin visits

Day 1

Protect kidneys and manage sickness

Ask / act: Confirm hydration, electrolytes, interactions and prescription.

Sources: NCCP 00339

4 Course completion

After four planned cycles

Agree follow-up

Ask / act: Review recovery, disease assessment and next plan.

Sources: NCCP 00339

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
