NCCP 00280 · clinician draft

Cisplatin + Etoposide

> **Which treatment this guide covers** This guide covers Cisplatin + Etoposide chemotherapy for extensive-stage small-cell lung cancer. Immunotherapy combinations and limited-stage treatment with radiotherapy use separate regimens. If an additional medicine or radiotherapy is prescribed, obtain its own plan and consent information.
>
> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.
