Carboplatin + Oral Etoposide

NCCP 00319 v5 · 21-day cycle

Carboplatin is planned into a vein on Day 1, before oral etoposide. Etoposide capsules are prescribed twice daily on Days 1, 2 and 3 only, on an empty stomach. The cycle repeats every 21 days while treatment is helping and side effects remain acceptable. Your team decides when to delay, change or stop; the source does not set a fixed number of cycles.
