

Trifluridine/tipiracil (Lonsurf)

NCCP 00382 · Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Trifluridine/tipiracil (Lonsurf)

Schedule to confirm with my team

Days 1-5: Take the prescribed dose twice daily.

Days 6-7: No Lonsurf.

Days 8-12: Take the prescribed dose twice daily.

Days 13-28: No Lonsurf; recovery and monitoring period.

Next cycle: A new 28-day cycle starts only if review and blood tests allow.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.

Trifluridine/tipiracil (Lonsurf)

NCCP 00382 · Cycle 1

Cycle number: _____ Start date: _____ Review date: _____

Current medicines / dose changes: _____

Record the worst symptom in each interval: dates, number of episodes/readings and effect on daily activities. A blank cell means not recorded, not "no symptom".

Symptom / body system	Days 1-7	Days 8-14	Days 15-21	Days 22-28
Blood / infection				
Mouth				
Stomach / bowel				
Energy / fatigue				
Skin				
Tablet handling				

What happened / what it stopped me doing

Advice received, action taken and follow-up

Call oncology promptly about new or worsening symptoms. Bring this record and your current medicines to review.

Trifluridine/tipiracil (Lonsurf)
