

TCHP

Breast · NCCP 00722 · version 2

Your medicines

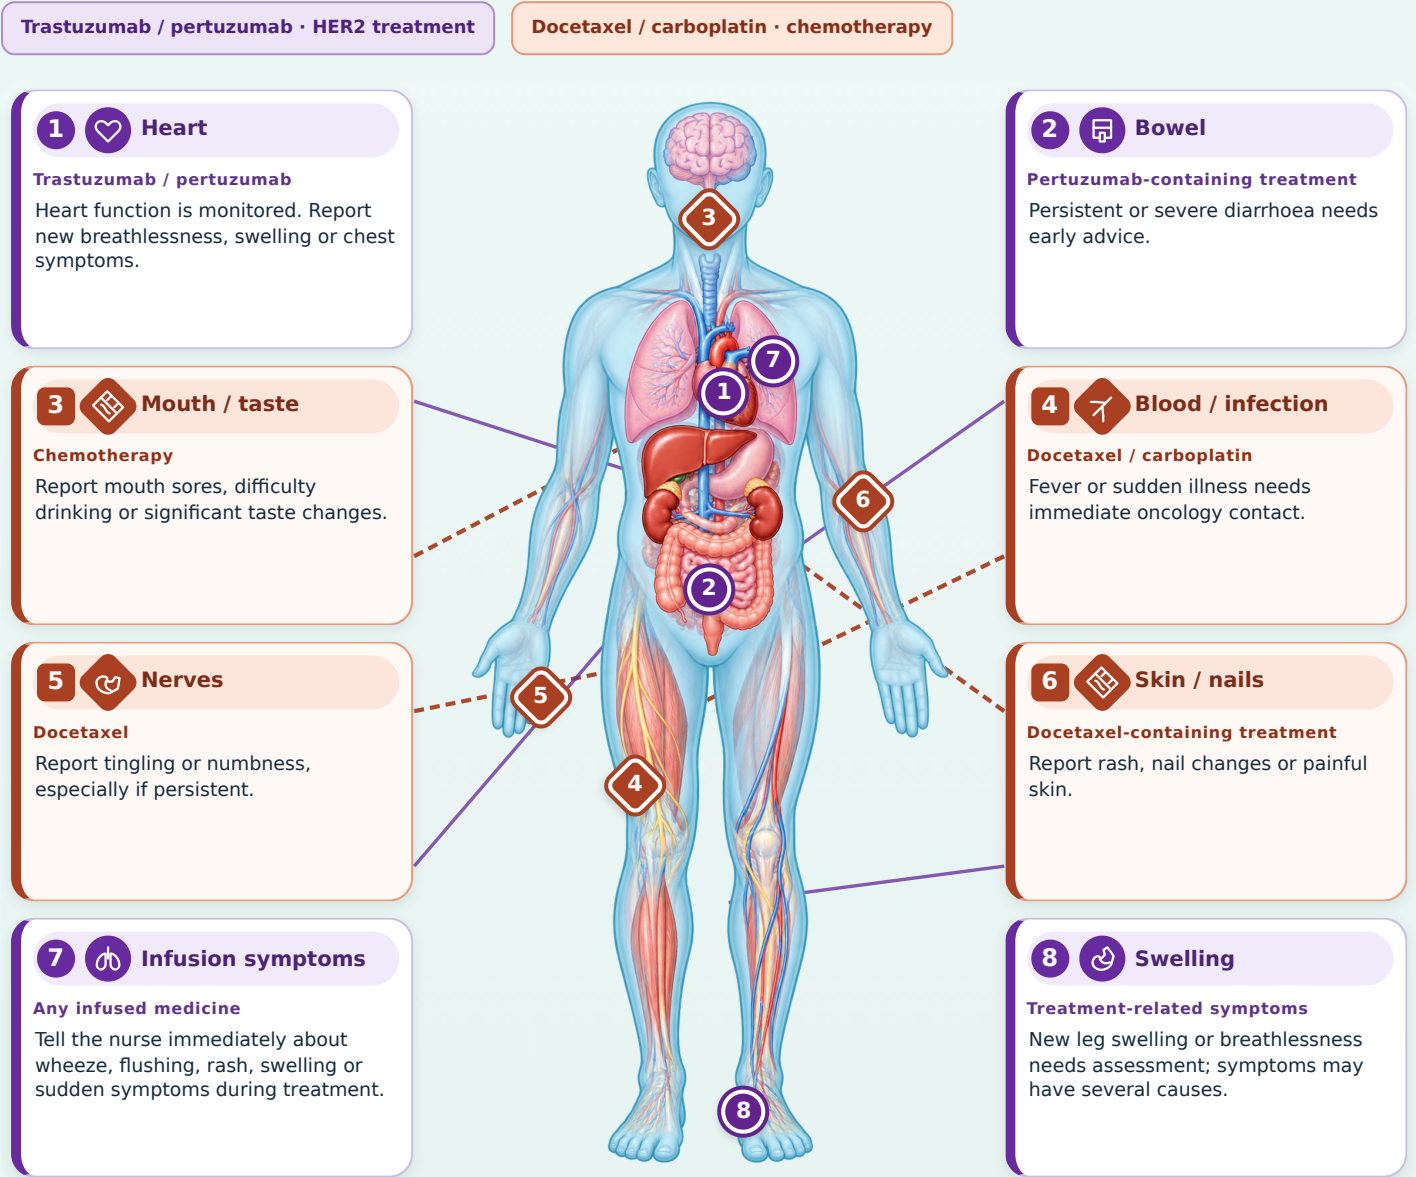

Docetaxel · Carboplatin · Trastuzumab · Pertuzumab

Your treatment schedule

Every 21 days

A picture of side effects

Tell your team about new or worsening symptoms. The same symptom can have more than one cause. Numbers connect each symptom box to its location.

This map shows selected effects to discuss; it does not show their likelihood or every possible side effect. Blood-count and whole-body effects are marked schematically.

Selected symptoms to help discussion. Tell your team about any new or worsening symptom. See page 2 for the schedule, support and QR.

TCHP

Breast · NCCP 00722 · version 2

Your treatment journey

Before cycle 1

Baseline blood tests and cardiac assessment are reviewed.

Cycle day 1

Docetaxel + carboplatin + trastuzumab + pertuzumab are given.

Days 2-21

Recovery, supportive medicines and symptom monitoring.

Every 21 days

The cycle repeats if review and blood tests allow.

After chemotherapy

HER2-directed treatment usually continues according to the post-operative/adjuvant treatment plan.

Monitoring and support

- Follow the prescribed steroid premedication around docetaxel.
- Growth-factor support may be part of the plan; follow the exact product and timing given by your oncology team.
- Cardiac function is monitored because trastuzumab/pertuzumab can affect the heart.
- Your current medicines, including non-prescription products.
- A note of new symptoms, when they started and what they stopped you doing.
- Any temperature, blood-pressure or bowel-count readings your team asked you to record.
- Questions about the purpose of treatment, scan/review timing or changes to the plan.

05 / when to call Do not wait for the next appointment Use your oncology SOS instructions Call oncology urgently for fever, severe diarrhoea, new breathlessness, swelling, severe rash, uncontrolled vomiting, significant bleeding or a rapidly worsening symptom. Severe breathing difficulty or chest pain: call 112/999. If your team has given you different local thresholds or emergency instructions, follow those instructions.
