

Pembrolizumab + carboplatin/paclitaxel → AC

NCCP 00857 · Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Pembrolizumab · Carboplatin · Paclitaxel · Doxorubicin · Cyclophosphamide

Schedule to confirm with my team

Cycles 1-4: Every 21 days: pembrolizumab + carboplatin on day 1; paclitaxel on days 1, 8 and 15.

Cycles 5-8: Every 21 days: pembrolizumab + doxorubicin + cyclophosphamide on day 1.

Surgery: Definitive breast surgery follows the neoadjuvant phase when clinically appropriate.

Adjuvant phase: Pembrolizumab continues after surgery: 200 mg every 21 days for 9 cycles or 400 mg every 42 days for 5 cycles, according to the treatment plan.

Throughout: Bloods and toxicity review guide whether treatment is given, delayed or modified.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.

Pembrolizumab + carboplatin/paclitaxel → AC

NCCP 00857 · Cycle 1

Cycle number: _____ Start date: _____ Review date: _____

Current phase: weekly taxane / AC / after surgery (circle); confirm your current medicines.

Record the worst symptom in each interval: dates, number of episodes/readings and effect on daily activities. A blank cell means not recorded, not “no symptom”.

Symptom / body system	Days 1-7	Days 8-14	Days 15-21
Hormones / brain			
Lungs			
Heart			
Liver / kidneys			
Nerves			
Mouth / bowel			
Skin / nails			
Blood / infection			

What happened / what it stopped me doing

Advice received, action taken and follow-up

Call oncology promptly about new or worsening symptoms. Bring this record and your current medicines to review.
