BASELINE → TREATMENT → FOLLOW-UP

Checks across the whole treatment course

The columns show the order of care, not equal lengths of time. Confirm who books each check, who reviews it and whom to call if it is missing.

Check	Before starting	Each treatment cycle	Between doses	Decision / response review	Completion / change
Blood count / kidneys / liver	Baseline bloods; DPD before fluoropyrimidine	Repeat before each cycle	Earlier tests if unwell, dehydrated or toxicity develops	Results and recovery guide any delay or dose change	Follow unresolved abnormalities
Symptoms and function	Document existing symptoms and usual activity	Review worst symptoms since the last treatment	Use urgent contacts; do not wait for the next visit	Balance benefit, side effects and priorities	Agree recovery care and ongoing support
Tablets / hands and feet	Confirm written dose, tablet supply and hold instructions	Review adherence, mouth, bowel and skin symptoms	Days 1–14 tablets; Days 15–21 planned break unless team changes it	Do not restart held tablets or replace missed doses without advice	Return unused tablets as instructed; follow persistent symptoms
Heart checks	Review heart history. The team may arrange an ECG or other tests if clinically indicated; NCCP does not mandate a routine ECG or serial echocardiogram schedule.	Ask about new chest pain or breathlessness	Chest pain needs urgent assessment	Repeat heart tests if clinically indicated	Follow any heart problem; no fixed echo series
Response / scans	Confirm cancer setting, disease assessment and intended duration	Review clinical benefit and symptoms	New symptoms may bring review forward	Consultant-directed scans and response assessment	Agree follow-up, completion or another treatment

The team arranges and reviews tests. This guide shows expected timing; it does not record completed appointments. NCCP 00216 v8 · official regimen

THE WHOLE TREATMENT JOURNEY

Capecitabine: treatment and checks

Colorectal and breast cancer

capecitabine twice daily on Days 1–14, then no capecitabine on Days 15–21. Follow your individual prescription.

Read from left to right. Columns show stages, not equal lengths of time. This is a general plan: no dates or personal information are needed. Your team confirms which steps apply and arranges appointments.

Treatment, tests and reviews across the course

Care / check	Before starting	Each treatment cycle	Between doses	Decision / response review	Completion / change
Blood count / kidneys / liver NCCP 00216	Baseline bloods; DPD before fluoropyrimidine	Repeat before each cycle	Earlier tests if unwell, dehydrated or toxicity develops	Results and recovery guide any delay or dose change	Follow unresolved abnormalities

What each check is for

1

21-day tablet cycle

Oral chemotherapy

Capecitabine is chemotherapy taken as tablets. NCCP 00216 covers several colorectal and breast cancer settings, including treatment after surgery and treatment of advanced disease. Ask which aim and duration apply to you.

Ask / act: Confirm the current phase, prescription, tests and support medicines.

Sources: NCCP 00216

At the next review, ask

- Which treatment phase am I in, and what happens next?
- Which test is expected next, who arranges it, and who explains the result?
- Who should I contact if an expected appointment has not arrived?

This map does not show whether a test has been ordered, booked or completed. Do not wait for a scheduled test if you develop new symptoms.
