NCCP 00702 · clinician draft

Entrectinib monotherapy · adult

Adult treatment scope · NCCP 00702a / 00702b This adult suite covers entrectinib alone for ROS1-positive advanced NSCLC before any ROS1 inhibitor (00702a), or a separate NTRK gene-fusion solid-tumour indication with no previous NTRK inhibitor and no satisfactory treatment options (00702b). Molecular tests and Irish access criteria must be confirmed. The adult 600 mg schedule does not apply to children.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Continuous entrectinib · individual support** — Minimal to low (oral) entrectinib
