

Pembrolizumab + pemetrexed + carboplatin

NCCP 00568 - Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Pembrolizumab - Pemetrexed - Carboplatin

Schedule to confirm with my team

Before cycle 1: Blood tests, kidney function, glucose and thyroid testing; folic acid and vitamin B12 support for pemetrexed.

Cycles 1-4 - day 1: Pembrolizumab + pemetrexed + carboplatin every 21 days.

Between cycles: Watch for immune symptoms and chemotherapy effects; they can occur at any time.

After cycle 4: Carboplatin stops if the plan is followed and disease/toxicity allow.

Maintenance: Pembrolizumab + pemetrexed every 21 days until progression or unacceptable toxicity, according to the treatment plan.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.
