

Adjuvant abemaciclib + endocrine therapy

NCCP 00619 - Set-up and treatment plan

My treatment plan

Treatment purpose / goals:

My oncology SOS number:

My treating team / hospital:

Medicines: Abemaciclib - Endocrine therapy

Schedule to confirm with my team

Every day: Abemaciclib 150 mg twice daily, with or without food, at approximately the same times each day unless your dose has been changed.

Alongside it: Continue the endocrine treatment prescribed for you.

First 2 months: Blood count, kidney/liver and bone profile are checked every 2 weeks.

Next 2 months: These tests are usually monthly, then as clinically indicated.

Treatment duration: Abemaciclib is taken continuously for 2 years or until progression/unacceptable toxicity, according to the NCCP source and your treatment plan.

My prescribed supportive medicines / changes to my plan:

Call first; write later. Do not wait for the next appointment or a diary score if a symptom worries you. Follow your oncology team's urgent-call instructions. For a medical emergency in Ireland call 112 or 999.

Scan for your regimen-specific patient portal and visual guide.
