NCCP 00219 · clinician draft

Erlotinib monotherapy

Which treatment this guide covers NCCP 00219a is first-line EGFR-mutated advanced NSCLC; 00219b is switch-maintenance after stable disease following first-line chemotherapy; 00219c is after failure of at least one previous chemotherapy regimen. Global NCCP eligibility requires a validated activating EGFR mutation in each setting. These are advanced-disease settings, not adjuvant treatment.

Supportive prescription draft for review. This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

Separate scripts for each phase

Choose the active phase in the clinician workflow. Each script has its own medicines, timing and review checks.

- **Erlotinib alone · daily oral treatment** — Minimal to low (oral)
  erlotinib
