NCCP 00857 · clinician draft

Pembrolizumab + carboplatin/paclitaxel → AC

> **Supportive prescription draft for review.** This is a regimen template. It is not an issued patient prescription; individual review and completion are required.

After surgery · pembrolizumab alone

Active medicines: Pembrolizumab

Emetogenic risk: Minimal

No routine prophylactic antiemetic order is populated for this phase. Agree an individual symptom-treatment plan where needed.

Additional phase-specific support

- No routine chemotherapy antiemetic prophylaxis. Previous nausea / infusion reaction requires individual assessment.
- Confirm q3-week or q6-week postoperative option. Immune symptoms can occur during or after treatment.

Before signing: verify allergies, current medicines, interactions, renal / hepatic function, QT risk, sedation, prior response, total steroid exposure and the rescue-medicine duration. Do not duplicate medicines from another phase.

Individual changes / rescue duration: _____
Prescriber / date: _____ Pharmacy review: _____
